

Industrial Solutions

In addition to erosion control, GeoHay has been found to be able to not only filter out sediment, but also has been able to reduce the amount of heavy metals, chemicals, and hydrocarbons in the runoff. GeoHay has been used in a multitude of industrial applications including: mining, golf courses, landfills, recycling facilities, chemical plants, shipyards, utility companies, agriculture, parks, and the oil industry. For a more detailed case study on some of these industries, please contact info@geohay.com
